

Brain Tumor Classification Report

Report Date:	2026-06-22 12:52:05
Patient Name:	4ett
Age:	1
Gender:	Male
Patient ID:	47
Contact Number:	ukyu
Address:	ygj
Report Type:	AI Medical Analysis

DIAGNOSIS

Tumor Type:	MENINGIOMA
Status:	Analysis Complete

ABOUT THIS CONDITION

A tumor that develops from the meninges (membranes surrounding the brain). Usually benign but can be serious.

DIETARY RECOMMENDATIONS

- Maintain a balanced diet with fruits and vegetables
- Include calcium-rich foods: dairy products, almonds, leafy greens
- Eat lean proteins: chicken, turkey, tofu, beans
- Consume whole grains: brown rice, whole wheat bread, oats
- Include vitamin B complex foods: whole grains, nuts, seeds
- Eat foods with magnesium: pumpkin seeds, almonds, spinach
- Limit salt intake to prevent fluid retention
- Avoid alcohol and caffeine in excess

EXERCISE & PHYSICAL ACTIVITY RECOMMENDATIONS

- Start with gentle walking (20-30 minutes daily)
- Practice low-impact aerobics: water aerobics, stationary cycling
- Include flexibility training: stretching, gentle yoga

- Do balance exercises to prevent falls
- Strength training with light weights (2-3 times/week)
- Avoid activities with high fall risk
- Progress gradually with medical supervision
- Monitor for any headaches or dizziness during exercise

IMPORTANT NOTES

- This report is generated using AI-based analysis and should not be considered as a definitive diagnosis.
- Please consult with a qualified medical professional (neurologist or oncologist) for proper diagnosis and treatment.
- The diet and exercise recommendations are general guidelines and should be customized based on your individual health status.
- Always inform your doctor before starting any new diet plan or exercise program.
- If you experience any unusual symptoms, contact your healthcare provider immediately.
