

Brain Tumor Classification Report

Report Date:	2026-06-21 19:43:39
Patient Name:	jhbskdsf
Age:	22
Gender:	Female
Patient ID:	255
Contact Number:	hgjgj
Address:	thfg
Report Type:	AI Medical Analysis

DIAGNOSIS

Tumor Type:	PITUITARY
Status:	Analysis Complete

ABOUT THIS CONDITION

A tumor of the pituitary gland, located at the base of the brain. Often affects hormone production.

DIETARY RECOMMENDATIONS

- Eat hormone-balancing foods: soy products, legumes, nuts
- Include iodine-rich foods: seaweed, fish, dairy products
- Consume foods rich in selenium: Brazil nuts, fish, eggs
- Eat balanced meals with complex carbohydrates
- Include lean proteins in every meal
- Eat omega-3 rich foods to reduce inflammation
- Maintain stable blood sugar: eat regular, balanced meals
- Limit sugary foods and refined carbohydrates

EXERCISE & PHYSICAL ACTIVITY RECOMMENDATIONS

- Engage in regular moderate-intensity exercise (150 mins/week)
- Include walking, swimming, or cycling
- Do strength training 2-3 times per week

- Practice yoga for hormone balance and stress relief
- Include stretching exercises daily
- Monitor energy levels and adjust intensity accordingly
- Stay consistent with your exercise routine
- Ensure adequate rest and sleep (7-9 hours)

IMPORTANT NOTES

- This report is generated using AI-based analysis and should not be considered as a definitive diagnosis.
- Please consult with a qualified medical professional (neurologist or oncologist) for proper diagnosis and treatment.
- The diet and exercise recommendations are general guidelines and should be customized based on your individual health status.
- Always inform your doctor before starting any new diet plan or exercise program.
- If you experience any unusual symptoms, contact your healthcare provider immediately.
